Instructions

State and Local Governments:

Agencies of the state, counties, cities, and other political subdivisions may claim a refund of state motor vehicle fuel taxes on fuel used in non-licensed, off-road equipment and machinery. Tax refunds also apply to fuel used in licensed vehicles, provided those vehicles are used for construction, reconstruction, of road or street maintenance projects.

Form:

If your form has a name and address imprinted on it and if the information is incorrect, make the appropriate corrections. If the social security or federal employer identification number is incorrect, enter the correct number in the space provided for that number. If your form does not have a name and address imprinted on it, enter your social security or federal employer identification number, name, and address in the appropriate spaces. Complete the form in its entirety and be sure to sign and date it. The claimant is directly responsible for the accuracy of the information. Fuel dealers are prohibited by law from preparing refund claims for consumers.

“Licensed Motor Vehicle” Defined:

“Licensed motor vehicle” means any motor vehicle licensed for operation upon public roads or highway, but does not include a vehicle with a permanently mounted manure spreader or stack moving unit.

Original Invoices or Sales Tickets:

Invoices, sales tickets, or certified listings which do not contain the required information will not be accepted, and the entire claim may be denied.

The law requires that invoices or sales tickets, or certified listings, detailing fuel purchases be submitted with claims for tax refunds. The information on these documents must be entered by the seller of the fuel. The law specifies that each invoice or sales ticket must include:

- The seller’s name and address;
- The date the fuel was purchased;
- The type of product;
- The number of gallons of motor vehicle fuel purchased;
- The state tax as a separate item or a statement that the state tax is included in the price; and
- The name of the claimant.

In addition, there should be a document number on the invoice or sales ticket.

The invoices or sales tickets must be ORIGINALS; and if the original invoices or sales tickets are lost, the claimant may substitute duplicates plus a separate affidavit on forms prescribed by the Tax Commissioner.

If there are 50 or more original invoices or sales tickets, those documents must be organized, as follows:

- In groups by seller of the fuel;
- In sequential order by document number within each “seller” group.
- With detailed and summarized gallonage totals attached to each group.

Certified Histories – In Lieu of Original Invoices:

A claimant may submit certified histories detailing the required information. Certified histories must be prepared by the seller of the fuel. The histories must detail each purchase of fuel on which a refund is claimed. The histories must include certification statements verifying that the information is a true and correct record of sales to the specific consumer; that original documentation is available for audit purposes; and, if the state tax is not listed as a separate item, that the tax was included in the price.

Mandatory Deductions from Tax Refunds:

The law requires that \$.01 per gallon be deducted from the tax refund for the following fund:

- \$.01 per gallon – Township Highway Aid Fund.

Audits:

Tax refund claims are subject to audit by the Tax Commissioner. An audit may be conducted any time within three years after the due date of the claim or within three years after the claim was filed, whichever occurs later. When a claim is selected for audit, the claimant is expected to provide any additional information required by the Tax Commissioner.

Instructions for Lines 1 – 6:

Line 1: Enter the total gallons of gasoline/gasohol purchased during calendar year 2006. (Do not include diesel fuel or propane purchases, and do not include E85 purchases made before 05-01-06.)

Line 2: Enter the number of gallons reported on line 1 that were used in non-qualified licensed vehicles.

Line 3: Subtract line 2 from line 1 to compute the net gallons on which the refund is based.

Line 4: Compute the tax paid on the net gallons subject to refund. Multiply \$.23 times the gallons on line 3.

Line 5: To compute the mandatory deductions, multiply \$.01 times the gallons on line 3.

Line 6: Subtract line 5 from line 4.
